

Internship offer

2018-2019

CHAINHERO

New world is coming!

For a period of 3 to 6 months

Research and development of blockchain products and prototypes

Context

After a partnership with IBM, toHero found chainHero (chainhero.io), its R&D branch dedicated to the Blockchain. ChainHero works to exploit within a company context, all the Blockchain potential through its products and prototypes.

Expectations and purposes

You will be integrated to one of chainHero's products team, in order to add features and improve performances. In addition, and depending of the clients needs, you may create new prototypes (analyse, conception, realisation, test) and potentially present it at some public events.

Your work environment is varied, complex and motivating!

- Hyperledger Fabric
- Go (golang)
- Linux
- NodeJS
- Angular / React
- TypeScript / ES2015 (ES6)
- Docker / LinuX Container (LXC / LXD)
- All in Open Source !

Fully integrated into our research and development team, strictness, independence and critical eye will be important factors for a good achievement of the mission. **But your motivation and curiosity, more than knowledge, will be the real assets to make your internship a success!**

The enterprise

toHero is a start'up founded in 2015, specialised in the skilled art of the web, digital and the open source.

toHero operates with CAC40 companies and SMB in order to offer a fully digital experience (identification of the need, specifications, ergonomics work, graphic proposal, development, hosting, outsourcing and formation).

Due to its rapid success and enthusiasm for new technologies, toHero has opened a research and development departement dedicated to the Blockchain (chainhero.io).

We always search of new enthusiastic co-workers that are able to give new perspectives and new experiences to our client and products.

If you search a stimulating place where there is plenty of technical challenges, do not hesitate and join us !
